Experience

Robot Camp

2022

- I have learned and practiced a wide range of activities related to robotics technology, from the basics to real-world applications.

Machine Learning

2023

- I have learned and practiced key machine learning concepts, including data preprocessing, model training, evaluation, and practical implementation using real-world datasets.

API & Framework

2024

- I gained hands-on experience with API and framework technologies, exploring everything from fundamental principles to building real-world applications using modern development tools.

Now

2025

- I am currently exploring and learning various emerging technologies to continuously develop myself, including frameworks like React and tools such as ChatGPT to enhance my skills and keep up with the latest trends.
